EFFECTIVE CARE FOR BLEMISHED, OILY SKIN

PURE VISAGE – this simple but effective facial care range combats blemishes gently but effectively whilst also helping to regulate the skin's oil and moisture balance. Highly effective natural plant-based active agents from Switzerland, DEFENSIL®- PLUS and zinc PCA all help to reduce spots and blackheads without drying out the skin. Regulates production of sebum, alleviates redness and irritation.

PURE VISAGE ensures with its natural systematic care improved skin texture, smaller pore size and a clear, fresh complexion.

CLEAN

STEP 1: CLEANSING FOAM

Get rid of the dirt of the day! Apply cleansing foam to damp skin, massage in in circles and rinse with water. Excess sebum is removed and irritation counteracted. For deep cleaning without drying out.

STEP 2: GENTLE PEELING

Open your pores! Apply soft peeling to slightly damp skin, massage in gently in circles and rinse off with water. The fine peeling bodies made from natural jojoba wax gently cleanse the skin. Clogged pores are opened and new impurities and blackheads are prevented. High-quality organic almond and organic jojoba oil care for the skin and provide moisture.

FAST & TARGETED HELP

STEP 3: ON THE SPOT ROLL-ON

No more impurities! If pimples and blemishes develop, use the Anti-Pimple Roll-On to specifically treat the affected areas after cleansing. Can be repeated several times a day if necessary. The fluid dries out pimples and impurities, soothes irritations and helps to reduce pimple marks.

CARE

STEP 4: REGULATING 24H-CREAM

Find your balance! The regulating 24h cream helps regulate the skin's fat and moisture balance. Zinc PCA fights skin blemishes and helps reduce sebum production. DEFENSIL®- Plus contributes to the development of the skin barrier and reduces redness. For an improved complexion, refined pores and a clear, fresh complexion.
